Premium Wood Composite Doors

Glass Options Program

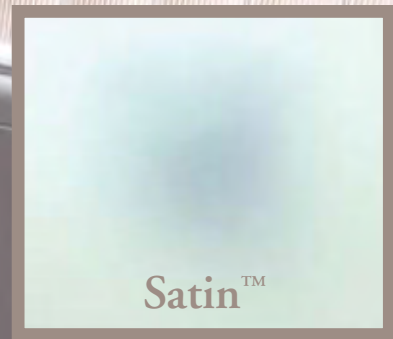

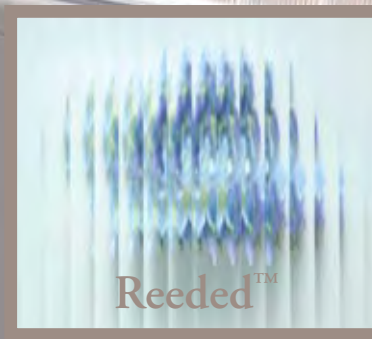

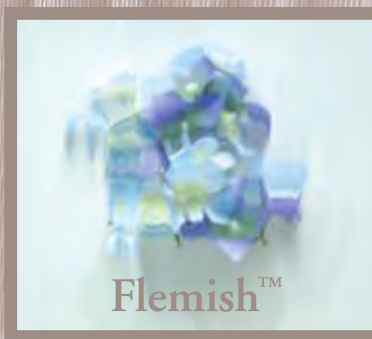

Bolection® takes custom-designed doors to an exciting new level with its new Glass Options Program bringing beauty, warmth and functionality to any room.

bolection®

Glass Options Program

The addition of glass panels to interior doors enhances the beauty of any room in your home. They welcome light into a room, suggest a larger space and add aesthetic or functional elements. Bolection has many styles of doors to choose from, and our manufacturing process makes it easy to substitute any door panel for glass.

Choose from true divided lite French doors to bring a timeless look to the home office or study, use frosted panels in a bath or kitchen door for a subtle glow of warmth, add an inset to a bedroom or closet door to create a full-length dress mirror, or work with our team of professionals to create your own unique design.

Bolection offers eight (8) of the most popular glass styles including Mirror and Clear. All glass options are either tempered or safety-backed.

Interested in additional glass options? Contact Bolection customer service at 877.713.3667 for more information.
